SWOT

Strengths : The best cookies have layers of texture. A slightly crisp outer shell that holds up to some heat with an inner core that's soft and chewy. Premium cookies taste great at room temperature, straight out of the fridge or slightly heated. Creating cookies in small batches is key.

Weakness : The organisation can draw the criticism from the environmentalists for its poor waste management practices and inability to integrate sustainability in business operations.

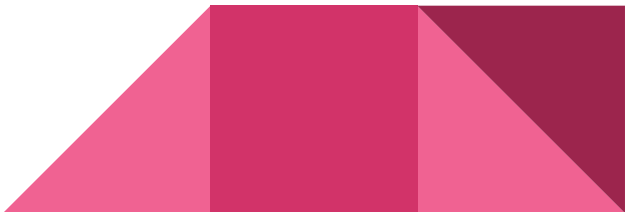

- The company may lose efficiency due to poor inventory management practices. The shortage or excessive inventory can either result into
- The cash shortage or insufficient current assets negatively affect the liquidity position and harms the overall business performance.

Opportunities :The exponential growth in the population, and particularly in the existing or potential customer segments is a great growth opportunity for the business organisation

- The changing customer needs, tastes and preferences can act as an opportunity if the business organisation has good market knowledge.
- The development of new technologies to assist the product/service production and delivery process can be exploited to embed the innovation in business operations.

Threats:Shortage of skilled labour in the market can make it difficult for the organisation to attract talent with the right skills set.

- The increasing number of direct and/or indirect competitors affects the organisation's ability to sustain and expand the customer base.
 - The deteriorating economic conditions affect business performance when they directly influence the customers' spending patterns and purchasing power.
 - The rise in inflation increases the cost of production and affects the business profitability.
- 

Competitor 2 : The Bread Company

USP : Identify your target market. Be the first to add your personal experience.

- Analyze your competitors. Be the first to add your personal experience.
- Define your value proposition. ...
- Craft your USP statement. ...
- Here's what else to consider.

Online Communication : Consumers collect recipes and food photographs on their smartphones and tablets assembled from a multitude of digital sources. One in three cooking enthusiasts get their recipes from social media, and 77% of internet users, 18 and over, used Facebook as a recipe source followed by Pinterest and YouTube, according to Mintel. Digital inspiration for recipes was found to be as important as recommendations from friends.

“Our digital content is curated to inspire fans visually with product, food, lifestyle and behind-the-scenes shots,” Ms. Hunt said. “Our Breadheads share their love of the brand, favorite varieties and recipes daily.”

Strengths :Marketing Strategy: Panera follows data-driven strategies. The company has technological superiority, which performs innovatively to cope with the 21st century;

- Service Quality: It uses E-Commerce facilities more effectively. It offers various options on its menu. It does not include artificial ingredients and uses all healthy products. It has reformulated 122 ingredients to ensure no artificial flavors, colors, sweeteners, sodium benzoate, and sodium nitrate.;
- Service Strategies: It follows a robust social media marketing model, and attracts a consumer demographic ranging from 25 to 44 years. Panera focuses on its customer-centric strategies. During this pandemic, Panera has started free delivery services.

Weakness :Product Diversity: The company has faced criticism for its lack of diversification and its small niche;

- Limited Market: It has its competitor like Starbucks, which operates globally, unlike Panera, whose business primarily focuses on U.S.A and Canada;
 - Lawsuit: There are controversial lawsuits which damage the company's reputation. More so, franchising may bring down the company's profitability.
- 

Opportunities : Globalization: The company should focus on global expansion to attract a deeper pool of potential customers;

- Diversity: It has opportunities to increase its growth and revenue. Diversity in its offering can help;
- New Customers: It can work on expanding the target food service market. It may add groceries that would cater to all age groups;
- Free Service: Panera has started a free coffee subscription service where customers can enjoy unlimited coffee throughout the day at a minimal rate.

Threats : Sustainability: Climate change has resulted in food scarcity. It has difficulty purchasing fresh farm products which it needs as raw materials;

- Global Recession: Albeit it has survived the global recession in 2008, it has not enough capability to do so in the future;
 - Fierce Competition: It has competitors like Starbucks, McDonald's, Dunkin's Donuts, and Chipotle. Panera's market share suffered because of them;
 - Profits and Revenue: The recent lockdown measures have caused enormous losses for the company.

Strengths : Production: Britannia Industries recently made some changes from the previous strategy to start production of its own products, in which everything was outsourced. This can help him keep the signature recipes and make the product as indigenous as possible.

- Market Share: Britannia holds a 30% market share of the Indian biscuit market. Good Day is No. 1 Player in Cookie Biscuit Segment.
- High Product Recall: Good Day has a high brand recall due to its aggressive advertising and brand name.
- Brand Name of Britannia: Brand Name of Britannia is associated with Good Day Biscuits. In the year 1892 Britannia was started in a small house situated at central Calcutta (now Kolkata) as a bakery that makes delicious golden brown biscuits

Weakness : Cost: Good day biscuits are made from rich, cost-intensive ingredients such as cashew and butter. However, the prices of biscuits cannot be higher because they are already at a premium level. This can ultimately prove to be a challenge for the firm.

- More concentration on milk production: Although Britannia Industries has always been in the Biscuit industry, the company now focuses more on dairy products like butter and cheese. The increase in the dairy industry may in the long term affect the clothing companies such as Good Day.
 - Lethargy to change: The Good Day brand hasn't changed its look or feel since the very beginning of the year, and taste is consistent. Although the recent effort to promote the brand with a smiley face has been a small rebranding, there is still ample room for change.
- 

Opportunities : Overseas Market: extending its business to another international market will enable the company to become a global player in food products.

- Opportunity to capture Rural Markets: Britannia can tap Rural Markets for Good Day biscuits.
- Use of Social Media and Modern Trade: Britannia can promote its products on Social Media and use Modern Trade Channels for increasing its sales.

Threats : The threat of substitution: sugar-based cookies and biscuits may face the threat of organic, sugar-free, and low-calorie biscuits being replaced. There is also a risk that people will stop eating stores and start baking cookies for themselves.

- Competition: Good Day is also facing competitions from SunFeast, Parle, and so on, other than internal brands such as Marie, Nutri Choice, and Milk Bikis.
 - Laws and Regulations: Government Rules and Regulations can also directly or indirectly affect the sales and production of the company.
-
